

Fuel Surcharge Prices

Due to diesel fuel operational costs, Delta Gases will implement a fuel surcharge for delivery invoices based on the diesel fuel prices specified below. This surcharge will be calculated on a Quarterly basis.

The following price list is provided to you by the Department of Energy website, Midwest.

The added fuel surcharge will apply to invoices where products are delivered to a customer's site via a Delta Gases vehicle and will not apply to cylinder rental invoices. Your understanding of this matter is appreciated. Being your supplier is important to us. We thank you for your business and look forward to additional opportunities to be of service.
